NAZI COUP ON BALTIC

John T. Flynn Says:

About Inventions . . . How They Happen and How They May Knock Depression

By JOHN T. FLYNN
NEA Service Staff Correspondent

Charles F. Kettering, General Motors' laboratory man and invention hunter, told the O'Mahoney monopoly committee in Washington that what the country needs is new industries. But what interested me most was his statement that you cannot just go out and look for new inventions and find them in a hurry.

He said he had young men working on definite problems for 15 years who had not found the answer yet. In that statement lies an important fact for thos who are sitting around waiting for a new invention to drag us out of the hole. I once spent a day with another man like Charles Kettering—Dr. Willis R. Whitney, retired head of the General Electric Laborntories.

He said that way of the great epoch-making inventions were discovered by ooking specifically for them. Scientists stumbled over them, often looking for something else.

The Roentgen rays—X-rays which have played so amazing a role in medicine and engineering—were not discovered because someone realized we ought to have a means of looking through a man's body and observoing its defects. Roentgen was looking for something else. When he found the X-ray it was good for looking through the teeth at hidden defects.

Flying Began With Fly Wheels

We did not learn to fly by working through a long series of inventions directed at that precise end. Flying became possible and indeed inevitable, Dr. Whitney told me, when the gasoline motor was discovered. The man who made that motor was not thinking about inventing flying.

Radio was not discovered by men seeking directly for a means of distant communication or or broadcasting. It was an accident. When Edison discovered the incandescent lamp he was deeply trouble by a glow which appeared neaer the base of the filament in the lamp. He worked and others worked to get rid of that defect—they called it the Edison effect.

They did not know it was radio they were trying to get rid of. For it is that phenomenon which led to radio when it was understood. It had actually been discovered for years before anyone knew it.

Curiosity Kills An Egg

At the time I talked to Dr. Whitney he had just made a strange discovery. He wasn't looking for it. He was experimenting with electricity as a means of stimulating the growth of plants. Out of mere curiosity he subjected an egg to the small device he had constructed. It killed the egg. So he thought perhaps he had found a means of killing insect pests. He put flies in a test tube and applied his current.

The flies died. When he ran a cold air current through the tube he found the flies came to life. Soon he discovered that what had happened to the flies was that the electricity had given them fever. In the end, what started out to be a means of stimulating the growth of plants ended in the fever machine—a machine to give fever artificially to human beings and to control that fever perfectly.

And it is an odd thing that this same Charles Kettering, intrigued by Dr. Whitney's interesting experiment, has spent a great deeal of money in his home town of Daytton to enable physicians to experiment with Dr. Whitney's fever machine.

Some amazing invention some of these days may bob up to knock the depression in the eye. But it will probably come as unexpected as the X-ray, the flying machine, the radio, the fever machine. One thing is sure—invention is not done.

Someone asked Thomas Edison on his

Hiram Surrenders But Heirs Battle the Tax Collector

Conflict Between States Often Results in Double Taxation

STORY OF ESTATE

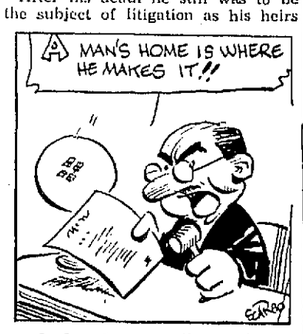

Today, States Are Honoring Each Other's Suits for Taxes

This is the last of four stories in which a mythical character, Hiram, has difficulty with conflicting state laws.

By HARVEY WERTZ
NEA Srvice Staff Correspondent

During his three-day life span, Hiram, the legal dummy, figured in a great deal of litigation involving his automobile, his wife and his taxes.

After his death he still was to be the subject of litigation as his heirs

A burning question: where lives a man, who has two homes?

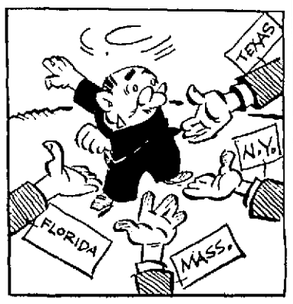

sought to divide the estate accumulated by the dummy who was the brain child of Dean Herbert F. Goodrich of the University of Pennsylvania law school.

Hiram's heirs had watched a few years ago as the highest court in the land swept away a great mass of precedent and simplified estate problems by a solution which came close to amounting to "one man, one tax."

"This was a highly desirable development," says the Dean. It appeared the court was doing a great deal for the taxpayer and it looked like only common fairness that a tax the size of an inheritance tax should be levied only once.

Now what are the problems left before us?" queries the Dean, and then answers: "The Supreme Court has said that the tax may be imposed at the domicile or home? But where is the home?

"Was Hiram's home in Ohio where he spent the winter, or in Michigan where he spent the summer? Only the courts can finally determine. The courts of New Hampshine have said a man's home is where he makes it, and

Assessments against the estate of Col. Greene amounted to more than his entire estate.

not where he would like to have it."

Tax Collector Rings Twice

Other courts, Hiram's heirs learned, have said a man's home is where he makes it and not of necessity where he says it is.

Dean Goodrich cited the case of a Dr. Dorrance.

"The law which may affect Hiram's estate was practically made in the case of Dr. John T. Dorrance, an extremely wealthy head of a great company. He had his home for many years in New Jersey. As his four daughters grew up they became interested in society and family moved to a Philadelphia suburb in Pennsylvania.

"At his death the state of Pennsylvania claimed an inheritance tax. Counsel for the estate came into court and protested that Dr. Dorrance was a resident of New Jersey, citing the fact that Dr. Dorrance had voted and paid taxes there, and had drawn his will under the laws of New Jersey.

A Thought

The Bible is a window in this prison of hope, through which we look into eternity.—Dwight.

Italians Have Good Memory...Go Back 13 Centuries for Claims Upon Tunisia

Seat of Ancient Carthage, Captured by Great Romans

But Rome Has Had No Claim There Since the Year 642 A. D.

VERY FERTILE LAND

Tunisia, Africa's Choicest Spot, Adjoins Italian Libya

Helen B. Metcalf is a well-known and widely traveled journalist who has lived in Tunisia and knows that country and its people intimately.

By HELEN B. METCALF
NEA Service Special Correspondent

What is behind Italian demands for return of Tunisia? How do Mussolini's underlings justify their diatribes against French control of that ancient African land?

One must go back about 13000 years for the answer, for Italian peoples have had no governmental control in or of Tunisia since 642 A. D.

Legend says the Phoenician Queen Dido built the famous city of Carthage, almost on the exact site of which the present Tunis, capital of the country, is situated.

In the second century B. C., Carthage fell to Rome, and for all but a few of the next 800 years the whole North African province belonged either to the western or the eastern Roman Empire.

In the 7th century it fell to the Mohammedan Arabs, and was known as the Kingdom of Kairwan. (The present city ofKairwan is the second holiest of the Moslem world; the pilgrim who cannot reach Mecca find his satisfaction at Kairwan.)

For brief periods Tunis came under the domination of Sicily and Spain, and then in the 16th century was conquered by Turkey, which allowed local autonomy.

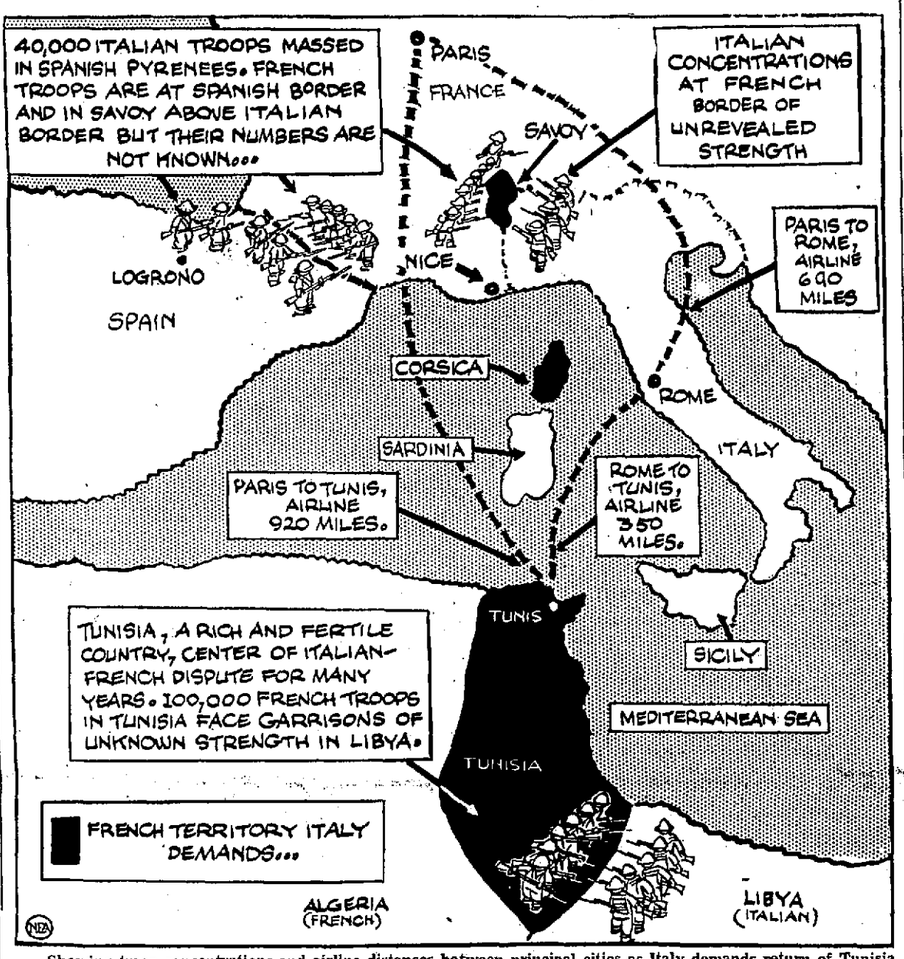

Resources Aplenty

Since 1100 A. D., European interests have fought for posssession of Tunisian natural resources.

Her coral fisheries on the northern coast are about the finest in the world.

Tunisia is the most fertile of the North African countries. Grain, grapes, citrus, grazing and special stud farms for horses and cattle are

(Continued on Page Four)

Showing troop concentrations and airline distances between principal cities as Italy demands return of Tunisia and other one-time possessions now held by France.

German Victory in Memel Balloting Stirs Up British

Both France and Britain Will Object to Any Annexation Plan

THREATS BY ITALY

Mussolini's Mouthpiece Now Wants to Take French Somaliland

LONDON, Eng.—(AP)—Prime Minister Chamberlain told the House of Commons Monday that Great Britain and France had expressed the "hope" that Germany would not annex Memel.

He also told parliament that Britain is not obligated to go to France's aid in the event of an Italian attack on France or her colonies.

Nazi Victory in Memel

MEMEL, Lithuania—(AP)—The pro-Nazi Memel directory, flushed with what it termed a smashing victory in the parliamentary elections Sunday decreed an end to Lithuanian police powers Monday in this former German territory.

The decree asserted that only police of autonomous Memel would be permitted to control the security of the territory lying in Lituanian's southwest corner, adjoining Germany.

Political observers declared the final decision as to any change in the territorial status of Memel, the object of German ambitions to expand along the Baltic, would be made at Berlin and not at Memel.

New Italian Threat

ROME, Italy—(AP)—Italy's need of French Somaliland for the development of Ethiopia was declared Monday by Virginio Gayda, Fascist editor who often expresses Premier Mussolini's views.

Gayda, who previously had aired Italy's alleged grievances against France in Tunisia, and her desire for lower tolls and a share in the control of the Suez canal, charged the French with hindering Italian colonial interests through the possession of Djibouti, the terminus of the railway linkink Addis Ababa, capital of Ethiopia, with the Red sea.

Gayda's declaration coincided with other Italian press charges that France is arming Tunisia, North Africa protectorate, for military use against Italy.

Nazis Win

MEMEL, Lithuania—(AP)—Nazis voted heavily and claimed a victory Sunday in the Memel Diet elections which were regarded as a prelude to return of the territory to Germany. Nazi party quarters said they had captured at least 26 of the 29 seats, although complete results will not be known for at least five days.

The election itself was marked by order among the 152,000 population—the only casualty in pre-poll activities being an American named Robert Sellmer, a free lance newspaper man.

(Reuters, British news agency, reported that Sellmer was a contributor to Ken magazine.)

Sellmer's statement to the Lithuanian Bureau of Public Activities, corroborated by a Kaunas journalist who was a witness, said he was beaten by three uniformed guards for not replying to Hitler salute as he was crossing a street in Memel early this morning. Two policemen intervened, he said, and he was taken to the police station where on policeman held his

SKI'S THE LIMIT

BY ADELAIDE HUMPHRIES

COPYRIGHT, 1938 NEA SERVICE, INC.

CAST OF CHARACTERS

SALLY BLAIR—heroine. She had everything that popularity could win her, except

DAN REYNOLDS—hero. He might have had Sally but while he was king on skis

COREY PORTER was king of the social whirl. So . . . But go on with the story.

* * *

CHAPTER I

THERE was really no doubt as to who would be chosen Queen of the Ice Carnival. All bets were on Sally Blair. Sally was the prettiest, the most popular girl to be invited to the winter festival. Sally, herself, would have been more surprised if she had not been chosen than she was when the committee informed her she had been.

"As if anyone else could be Queen!" Corey Porter said with smug gratification. For Sally was Corey's girl. For the next few days, anyway.

It was no small feather in Sally's pretty cap to have been invited by Corey, either. Corey was president of his senior class, best fraternity on the campus, keyman. He was the only son of Peterson Porter, the steel magnate, no mean accomplishment in itself. They made a handsome couple, Sally and Corey, swinging along, hand in hand, toward the practice hill where contestants would be getting in trim for the big meet the next day. Sally was as small and dark and sparkling as Corey

Brazilian Heads Pan-America Unit

Franco, Ex-Foreign Minister, to Direct Western Peace Move

LIMA, Peru.—(AP)—Alfrania de Mello Franco, former foreign minister of Brazil, Monday was elected chairman of the important Pan-American conference committee for the organization of peace.

The committee, of which Alf M. Landon is the chief United States member, has already started work on a sweeping project for safeguarding the security of the Americas.

Argentina With U. S.

LIMA, Peru.—(AP)—The north and south poles on Pan-Americanism—the United States and Argentina—seemed in agreement Sunday as the first week of the Pan-American Conference executive work opened with prospects of attaining outstanding accords for preservation of peace and integrity in the New World.

The two nations whose disagreements in the past have marred several Pan-American conferences appeared through their represenatives, United States Secretary of State Cordell Hull and Argentine Foreign Minister Jose Maria Cantilo, to be in agreement on most of the principles to be followed.

The warm handshake, almost an embrace, which Canilo gave Hull when the latter finished his speech Sunday was deemed by delegates today to be symbolic of a new feeling between the two countries. Hull had joined Cantilo and Dr. Carlos Concha, Peruvian foreign minister, in proclaiming the need of a common front by the Americas against outside military or political invasion.

Would Squelch Germans

The Brazilian delegation prepared a plan for submission to the Congress providing a declaration against any minority claiam which might be made upon the Americas. The proposal obviously was designed against possible claims such as those by Czechoslovakia's Sudeten Germans which preceded dismemberment of the European republic.

The Brazilian delegation was said to have been inspired by fears caused by the existence in Brazil of a minority movement among the German population of Rio Grande do Sul and Santa Catharina. In those states there are communities where only the German language is spoken. There are approximately 500,000 Germans in Rio Grande

Hope Girl Injured in Auto Accident

Miss Lorene Green in Julia Chester Hospital With Broken Ankle

Miss Lorene Green, about 20, Hope telephone operator, sustained a broken right ankle and bruises about the body about 2 a. m. Sunday when the car she was driving crashed into the rear of another machine which was parked on highway 71, two miles north of Texarkana.

Miss Green was taken to a Texarkana hospital and later removed to Julia Chester hospital at Hope. A physician Monday said Miss Green was resting well.

Three other Hope persons were riding in the car with Miss Green. They were Noel Alford, Richard Arnold and Valla Dean Arnold. They escaped with minor bruises when the car went into a ditch after striking the automobile which was parked on the highway.

The car which was struck speeded toward Texarkana after the accident an no identification was made. The car in which Miss Green was riding was damaged considerably.

The Hope group was returning home from Club Lido at the time of the accident.

Brother of Hope Woman Is Killed

Leland S. Shaw Fatally Injured in Automobile Accident

Word was received Monday of the death of Leland S. Shaw, brother of Mrs. Carl B. Jones of Hope.

Mr. Shaw, son of the late Judge D. A. Shaw, attorney of Poteau, Okla., was instantly killed Tuesday, December 6th, in an automobile accident near Washington, D. C., where he had been employed for the past three months.

The body was sent to Poteau, Oklahoma, for burial. He is survived by his wodow and son stepmother, Mrs. Nora Shaw, of Oklahoma City, and several brothers and sisters.

High School Band Will Give Concert

First of Winter Programs to Be Given Tuesday Night

Presentnig its first concert of the winter season, the Hope High School Band, under the direction of Thomas Cannon, will be heard Tuesday night, December 13, at 7:30 at the city hall auditorium.

A very interesting and unusual program has been arranged with the idea of having something which will appeal to every taste. The program follows:

March, Collegian, Yoder.

Overture, "Barber of Seville," Rossini.

Selection, "Morning," from "Peer Gynt Suite," Grieg.

Trumpet Trio, "Trumpeters Three," Johnson.

March, "Semper Fidelis," Sousa.

Intermezzo, "In a Persian Market," Ketelby.

March, 'Stars and StripesForever," Sousa.

Brass Sextet, "Memories of Stephen Foster," Selected.

Two Christmas Carols, (a) "Hark the Herald Angels Sing," (b) "It Came Upon a Midnight Clear," (the audience will join in singing).

March, "Colonel Bogey," Alford.

"Star Spangled Banner."

Asks 6-Year Term for Tax Officials

House Speaker Would Strengthen Assessors and Collectors

LITTLE ROCK—Speaker John M. Brandsford of the House of Representatives told the Arkansas Assessors association Monday that county assessors and tax collectors should be elected for six-year terms without the right to succeed themselves.

Beg Pardon

The name of Evan Wray was omitted from the $5 list of donations to the Goodfellow's club which was published last Friday. The Star regrets this error. Mr. Wray was one of the first group to contribute to the fund.

It was also reported that the Syd McMath Scottish Rite club donated $5. The name of the club should have red: Scottish Rite club of Southwest Arkansas.

Democracy Not Inefficient As Its Critics Maintain

The commonest excuse for a dictatorship is that it gets things done. Democracy is fine in theory, say the totalitarians, but it is inefficient. It substitutes talk for action, and it just can't function properly in a complex and problem-laden world like the present.

So it is a pretty good idea to look at the record now and then and see how things do get done in a democracy. It just happens that democracy's actual record of achievement is nothing to be ashamed of; it also happens that this habit of talking everything over at great length is an essential part of the machinery by which things get done.

A recent bulletin from the Maternity Center Association of New York points out that our American democracy has been quietly but steadily solving one of its most difficult and pressing problems—the needless waste of life of mothers and children in childbirth.

For two decades or more the maternity death rate in America remained at a shockingly high level. The science of obstetrics was making rapid strides, but America's material death rate was the highest in the civilized world. For one reason and another, mothers simply weren't getting the care they needed.

People began calling attention to this. Newspaper and magazine articles were written, public health authorities made speeches—the democracy, in other words, began to talk. But there is one thing the critics of democracy forget to mention when they denounce this habit of talking: sooner or later, the talk has an effect. People listen to it and are storred to action. And so it was in this case.

The medical profession studied the problem. It found that a part of the blame was its own. Poor medical training was responsible for some of these deaths; poorly managed and poorly equipped hospitals were responsible for others; shortcomings on the part of individual doctors and nurses were responsible for still others.

So the profession went to work to remedy matters. County medical societies offered special training for doctors doing obstetrics. Steps to improve the teaching of this science in the medical schools were taken. New maternity clinics were opened. The care given mothers in hospitals was improved.

What has been the result The bulletin from the Maternity Center Association gives the answer:

"The maternity death rate is no longer stagnant. It is falling steadily, and in many states is falling rapidly. In New Jersey and Rhode Island, where this co-operation and self-criticism has reached its peak, the material death rate is far below the national rate."

This problem was extremely complex and involved; the last sort of problem, one would say, that a democracy could hope to handle successfully. Yet it is being solved, and the job is being done in the typical democratic manner—Through self-criticism and cooperation. For democracy is not, after all, quite as inefficient and slipshod as its critics like to maintain.

Death Rate From Diabetes Has Declined at Most Ages

The death rates from diabetes seem to be increasing in most countries. The reasons are many. Most important is the fact that more people are living longer thaan people used to live. When cognizance is taken of this factor, the increase in the death rates from diabetes disappears entirely. Thus the rates of death from diabetes have declined at most ages and are found to be increasing among men only after 65 years of age and among women only after 55 years of age. Strict attention to the ailment will add many useful years to the average life.

Whenever sugar is found in the urin one must be suspicious that the condition is diabetes. The modern treatment of diabetes involves the use of diet and insulin — not only the old insulin but also the new type of insulin which is called protamine zinc insulin. The chief advantage of protamine zinc insulin is its usefulness in mild cases, and the fact that it bring the patient closer to normal living, because usually it needs to be taken only once a day.

Diet is still an integel part of the treatment of diabetes. Control of the diet need not be a highly complicated or complex matter. The diabetic diet is simple. As pointed out by Dr. E.P. Joslin, the doctor merely needs to elarn the patient's usual diet, and then make the simple adjustment that areneeessary to meet the special needs of his condition.

Patients with diabetes frequently do not die of diabetes itself, but rather of the serious complications. The most serious complication of diabetes is diabetic coma in which the patient becomes unconsious and dies unless immediate treatment is given. The patient must learn first of all to prevent the onset of coma by learning exactly what to do if he feels suddenly weak. The first step is the giving of insulin, and the second step is the giving of enough fluids and salt, but obviously any patient who has gone into a coma should be taken immediately to a hospital. In the hospital everything for determining the extent and character of his condition is available.

Once there were two classes of people parteiullarly who died of diabetes; namely, children and prospective mothers. Girls with diabetes seldom lived long enough to get married and have children. If they did they were unable to carry the child to the time of birth. Today the treatment of children makes it possible for young women with diabetes to grow older. Moreover, women who develop diabetes later in life can now have children if they are under suitable care so thata their condition is constantly under control.

The chief dangers from diabetes are of course, surgical complications, as represented by gangrene and infections of the skin. The importance of care of the skin, and particularly of the feet, has beenstressed so often thata every person with diabetes ought to be aware of the dangers. The feet should be washed daily. Dry skin and nails must be softened and there should be periods of rest for the feet. When new shoes are worn they should be broken in slowly. The feet of the diabetic person should be examined at lesat once each week so as to catch the slightest difficulties at the earliest possible moment. The circulation of the blood in the feet must be given attention.

Every injury or abrosion of the skin must be suitably treated at the earliest possible moment. Here it may be necessary to avoid the use of severe antiseptics, becuse they may do as much damage as good.

The system of sergeating all prisoner in seperate cells was first tried out in acomprehensive way in Philadelphia about 1830.

BARBS

The Monday morning quarterbacks may now break training until January 3 when Congress meets again.

The hero of this generation will not be Hitler or Chamberlain but the fellow who figures out some way to dance cheek to cheek with a college gal in a hoop skirt.

If Roosevelt wins the Nobel Peace Prize it will be only ordinary courtesy if he shares it with Ferdinand the Bull.

A science note which may be helpful to recent college graduates is that most leather gloves are made of sheepskin.

Public improvements being completed throughout the country cause hope the Indians may reconsider and take the country back when it is in shape again.

Question on Page One

1. True. An olla is a Spanish jar.
2. True. Football players may lose as much as 10 pounds in a hard game.
3. False. Al Smith's birthday comes on December 30.
4. False. The World Court meets at The Hague.
5. False. The Bessemer process is a method of making steel.

When He Wants to Relax He Hops a Car

By the AP Feature Service

SALT LAKE CITY.—Retired, elderly Frank P. Gorman travels a distance equal at once around the world every eight months yet never leaves Salt Lake City. Total cost of the "voyage" is $41.66.

The "world traveler" sees the same scenery all the time because his trips are made around Utah's capital in street cars and busses. He rides simpy because he enjoys it and because the cost is so low.

Gorman's transportation costs $1.25 a week—the price of a weekly ticket. Often, he says, he makes several trips in a single day over the same route. Whenthe Salt Lake Citytrips get monotonous, he goes to Los Angles and rides the street cars and busses there.

Gorman, so familiar to street car operators by now that they call him "Frank," believes he's the world's "number one street car passenger."

India and China cambined produce two-thordds of the world's rice.

Today's Pattern Bureau, 211 W. Wack Drive, Chicago, Ill.

lips brushed his. There was mois- | have the patience to stick it out. | THE END | of $6,999,361. | forget to take notes. But I never shall |

State of Arkansas,
County of Hempstead.

AFFIDAVIT

I, Jas. E. Bearden, Sheriff and Ex-Officio Collector of Hempstead County, Arkansas, do hereby certify that the attached is a true and compared list of all persons, firms and corporations whose personal taxes were not paid as of December 1st, 1938, and the same are hereby returned delinquent.

JAS. E. BEARDEN
Sheriff and Ex-Officio Collector.

Music As a Relief

Today there is evidence aplenty that we need release from our pent-up feelings. The jittery life we lead tends to tie our nerves in knots. Mental kinks, repressions complexes are cited as the price we pay for modern civilization. We have many ways to condition our bodily comfort but few to condition our winds. Chas M. Schwab says, 'There is reach to music that the other arts have not." On Sunday afternoon at the First Methodist church, the Choral club of the Friday Music club directed by Mrs. J. C. Carlton presented its annual gesture to the music lovers of our city—a presentation of "The Messiah." The Choral club was assisted by members of the different church choirs. Mrs. B. C. Hyatt presided at the organ and the script was read by Rev. Kenneth L. Spore, pastor of the First Methodist church. The choruses and different solos were well rendered, and when the climax was reached in the beautiful and impressive "Allelujah Chorus" as has always been the custom, the audience with one accord rose to its feet, in appreciation of this soul reaching immortal classic. For music is well said, "To be the speech of angels."

—o—

The Friday Music club will celebrate with its annual Christmas party on Friday evening at 7:30 at the home of Mrs. J. M. Houston, North Pine street. Each member is requested to bring a gift, not to exceed 25 cents.

—o—

The John Cain chapter, D. A. R. will hold its December meeting with a luncheon at 12:45 Wednesday at Hotel Barlow, with Mrs. J. M. Houston, Mrs. R. E. Cain and Mrs. Lee Holt as associate hostesses.

—o—

Mrs. H. H. Stuart has has been called to Sedalia, Mo., to attend the bedside of her sister, Mrs. Mann, who is seriously ill at her home in that city.

—o—

Mrs. L. B. McIntosh, a former resident of Hope, now of Chicago arrived Friday for a visit with friends.

—o—

The Oglesby P. T. A. will meet Tuesday afternoon at 3 o'clock, at the Oglesby school. The fifth grade will be in charge of the Christmas program and the Junior Band will play. All mothers are urged to be present.

—o—

Mrs. Frances Barham Graham will present a Christmas Dance recital, Friday night, December 16 at Hotel Barlow.

—o—

The High School Band, Thos. Cannon, director, will give a concern on Tuesday evening at 7:30 at the city auditorium. This concernt promises to be the best effort presented by this splendid group of musicians, and while we are in a holilay mood, why not lend the gand a helping hand, with your presence Tuesday evening.

Mrs. Chloe Wright of Waterloo was the Sunday guest of friends in the city.

Eason Is Elected

(Continued from Page One)

include Jonesboro, Blytheville, Camden, El Dorado, Hot Springs, Nashville, Prescott. Hammons said as quickly as dates and places could be arranged, the games will be announced. The schedule will probably include 12 games next season.

Basketball Opener

The Bobcats will open the cage season here Monday night against Prescott.

The game, sarting at 7:30 o'clock, will be played in the Hope High School gymnasium. The admission will be 10 and 25 cents.

The Prescott team has already played two games, losing to Laneburg in the seeason's opener about two weeks ago, and defeating Gurdon last Friday night.

The probable sarting lineup for Hope will be: Forwards—Green and Purtle. Guards—Baker and Eason. Center—Jones.

Schoolmasters Club Meets Monday Night

The Schoolmasters club of Hempstead county will meet at 7:30 o'clock Monday night at Capital hotel. All members are urged to attend.

School directors and other friends of education are welcome to attend.

7,000 Miles for Rural Electricity

Arkansas' Progress Is Praised by Officials of the REA

The present rural electrification program will send power into 53 of Arkansas' 75 counties over more than 7,000 miles of lines, Lee H. Garland, secretary of the Hempstead County Farm Bureau, has been advised by Executive Secretary Waldo Frasier of the Arkansas Farm Bureau Federation.

"All proposed rural power projects in Arkansas were reviewed at a series of conferences held in Little Rock last week, at which representatives of the Rural Electrification Administration were present," Mr. Garland said. The meetings were arranged by the Arkansas Farm Bureau, the Agricultural Extension Service, and the State Department of Public Utilities.

Between 5,000 and 6,000 miles of proposed rural lines to be built at a cost of approximately $6,000,000 is Arkansas' answer to REA Administrator John M. Carmody's challenge when he visited Arkansas last July that there was $7,000,000 available for this state if the farmers would "Get busy," Mr. Frazier said.

When C. O. Falkenwald, director of the REA examining division, visited Arkansas in early October the current rural electrification program in this state was planned.

"I was amazed at the progress you have made," Mr. Felkenwald said last week when he again visited Arkansas. "You have covered the entire state thoroughly in six weeks. You have accomplished what ordinarily would take several years to do. I assure you that the REA has watched your activities with interest.

"A week ago when Mr. Carmody was addressing a REA conference in Washington he remarked that 'There is something new going on in the way of state cooperation. It is in Arkansas where they have worked out a new plan."

Vote Cotton Law; Beat Rice, tobacco

Administration Hails Cotton Vote as Test of Crop Control Law

WASHINGTON —(AP)— Administration leaders expressed confidence Monday that any congressional attempt to remove all crop restrictions would fail as a result of the referenda approving cotton marketing controls but rejecting quotas for rice.

Secretary Wallace, obviously pleased, declared the cotton victory overshadowed the rejections, and assured permanence for the New Deal's control policies.

Virtually complete returns from Saturday's referenda were:

Cotton quotas: For 948,789; against 180,156. Per cent for 84.

Rice: for 3,509; against 3,874. Per cent for 47.4.

Tobacco Quotas Lose

WASHINGTON—(AP)—Secretary Wallace Said Sunday night that results of Saturday's farm referenda, in which cotton growers approved and rice and flue-cured tobacco producers rejected marketing controls, signified permanence for the New Deal's farm program. He hailed a decisive vote for cotton marketing quotas as overshadowing defeats for sales restrictions on the other crops.

"The national farm program as a whole, open to producers of all crops, will go on," Wallace asserted.

He contended that the tobacco and rice rejections—first encountered under the present crop control law—reflected a belief of many growers of these commodities that their price and supply situations were not serious enough to warrant marketing restrictions next year.

On the other hand cotton farmers, Wallace said, realized "there was no prospect that foreign and domestic outlays would take enough cotton to bring the supply down to manageable proportions without the continuation of existing control measures.

Administration leaders expressed belief that the cotton results would fortify the present farm act against critics in the new congress. The referenda had been watched as a test of the attitude of Southern farmers toward the New Deal's theory that agriculture prosperity could best be attained by governmental regulation of production and sales. They afforded the first such test since the administration suffered losses in the Midwestern corn and wheat belts at the November elections.

A tabulation of about 90 per cent of the expected ballots gave 940,393 votes for cotton marketing quotas and 177,855 against. This exceeded the two-thirds majority, necessary to put the quotas into effect by about 18 per cent. It fell short, however, of the 92 per cent majority accorded 1938 quotas in a referendum last March.

With about 90 per cent of the expected returns tabulated, the tobacco referendum gave 130,372 for quotas and 98,658 against, or a 56.9 per cent majority that fell considerably short of the required two-thirds margin. Quotas for this year's crop had been approved by a majority of 86 per cent.

Latest tabulations from the rice election, representing about two-thirds of the anticipated vote, showed quotas trailing by a count of 3,452 to 3,812, or almost 20 per cent short of the necessary majority. This was the first time producers of this crop had balloted on a marketing control program.

Extension Announced for Testing Vehicles

LITTLE ROCK—(AP)—Supt. Gray Albright of the state police Sunday announced an indefinite extension of the deadline for testing of motor vehicles. He estimated that approximately 100,000 of the 225,000 vehicles in the state had been tested and explained there could be no legal extension after January 1.

Seat of Ancient

(Continued from Page One)

the large industries of the northern region, just above and below the Medjerda River.

Along the the eastern coast, the Sahel, there is extensive production of lives, and in the south, near the shotts, the dry salt lakes, about whose shores are the magnificently fertile oases, a great date country.

Turnisia also is extremely rich in phosphates, has some iron, zinc, and lead, and her pink marble from Shemtu is world-famous.

The European powers most concerned have been France, England, and the Italian cities. In addition to concessions for exploitation of Tunisian resources, they sought telephone, telegraph, cable, and railroad concessions. Because, the local rulers, the Beys, overtaxed the people in order to live in unbelievable luxury, concessions to foreign powers were granted happily as sources of additional income.

When unification of the Italian city states into the Kingdom of Italy took place in 1860, the situation became acute. The new Italy immediately wanted to restore old Roman glory. It became evident the Bey was favoing Italy and that Germany and England would not object. France stepped in and took Tunis. As a pretext she used the attacks of the Khroumirs, a marauding Algerian border tribe, but that was only a pretext to cloak thinly the reeal motives.

Many Factors Involved

The French protectorate was established in 1881. Immediately the French began extensive developments and the need for laborers was acute. The Italians flocked in, for Sicily was only 100 sea miles from Tunis. The French took the role of employer, and the Italian of empoyee, competition with the native Arab.

Italy wanted to keep her sons and daughters Italian—have them speak Italian, go to Italian supported schools, and share in the government of the Protectorate. France wanted them Gallicized.

The problem grew more and more complicated up until three years ago, when it was believed a final compromise had been reached.

Both school and nationality issues were conceded to the Itaalians until 1965, when automatitc French nationalization of Ittalian Tuisians was to take place and when all schools were to become French.

Mussolini seemed satisfied and both parties contracted to submit any possible later isues to arbitration.

The powers allowed Italy to take Libya, next door to Tunsia, in 1912, and she helped herself to Ethiopia in 1936. Neither country is suited to colonization. Italy must expand or explode, because of surplus population. She needs to supplement her food supply and essential resources.

The resulting situation is this:

Germany succeeded at Munich and hopes in time to get back her forfeited African colonies. She may be sympathetic with Italy, although the Franco-German pact may delay or obvioate direct support.

If Italy were in Tunisia, she would have nearly complete control of the Mediterrancaen. Britain could not stand for that.

France has to protect her investment in Tunisia, as well as in Alberia and Morocco. Her manpower in the event of a war must be supplemented from her colonial possession. The Tunisian harbor of Bizerta and the powerful Karouba airbase are wartime essentials.

Final Red Cross Report $1072.49

Mrs. Snyder and Mr. Weisenberger Express Thanks to Community

Royce Weisenberger, roll-call chairman, and Mrs. Kline Snyder, chapter chairman, make their final report for the Red Cross drive for the year 1938, showing a total of $1,072.49 compared with $963.90 during 1937.

They want to express their appreciation to every individual who has co-operated in making this year's roll call drive a success.

Hope Negro Faces Charge of Murder

D. C. Wingfield Held for Court Following Hammer Death

A murder charge was filed Monday against D. C. Wingfield, Hope negro, following the death of Sterling Maxwell, another negro, died of injuries about the head.

The Maxwell negro was attacked the night of December 3 and struck on the head with a hammer. He died last Thursday. The fight occurred in the southern section of town.

Wingfield was arraigned before Municipal Judge W. K. Lemley here Monday and was held for action of Hempstead circuit court without bond.

Other court cases:

Leroy Gulley, assault and battery, tried and acquitted.

Gillespie Woods, wife and child abandonment, fined $50 and sentenced to three months in jail. He filed notice of appeal. Bond was set at $250.

S. Crumbler, drunkenness, forfeited $25 cash bond.

Eula Jones Young, bigamy, acquitted.

Reece Nelson, Frank Smith, Harrett Hathcoat, Bess Butler and Carl Carver each pleaded guilty to drunkennes. Each was fined $10.

Jack Smith forfeited a $10 cash bond for drunkenness.

Charlie Jones was given judgment of $45 in a civil suit brought by Mart Yocom against Andrew Jones for action in replevin for possession of certain personal property.

Order Missouri to Enroll Negro

Supreme Court Compels His Enrollment in School of Law

WASHINGTON.— (AP) —The United States Supreme Court ruled Monday that the University of Missouri Law School should admit Lloyd L. Gaines, St. Louis negro, as a student.

Gaines contended that he was rejected solely because he was a negro, and that this violated the "equal protection" clause of the federal constitution.

Brazilian Heads

(Continued from Page One)

do Sul alone.

New Road

Although today was a holiday, some work of the conference went on. Many delegates drove over the new highway to Huara to pay tribute to the liberator, San Martin, who proclamied Peruvian independence from the balcony of a small house there in 1820. Significance of the drive was that the new road, an excellent highway, will be part of an eventual Pan-American highway designed to link North and South America with a 10,000-mile band of cement.

Negro Progress Program Tuesday

Will Observe 75 Years of Progress Among Negroes of America

Seventy-five years of progress of negroes of America will be celebrated with a program here Tuesday night at Yerger school building. The program begins at 8 o'clock. The public is invited.

A spokesman for the program committee said that a choir of 100 voices would be heard. The program is under auspices of the negro P. T. A. Reservations have been made for white persons.

The program:

Selection—Progress Choir.

Invocation—Rev. M. E. Strong.

Selection, Negro National Anthem—Audience.

Introduction of Mistress of Ceremonies—B. M. Lewis.

Selection—Progress Choir.

Progress In Education—Prof. James Harris.

Anthem, Praise Ye the Father—Gurdon High School Chorus, directed by Naomi Yerger.

Progress in the Business Field—C. W. Hicks.

Solo, "Go Down Moses"—W. C. Easter.

Progress in the Medical Profession—Dr. R. C. Lewis.

Selection, Progress Choir.

Progress in Religious Field—Rev. G. W. Young.

Selection, Spiritual, "Good News, Chariots Coming"— H igh School chorus.

Address—Albert Graves, Mayor.

Solo—Clifford Carmichael.

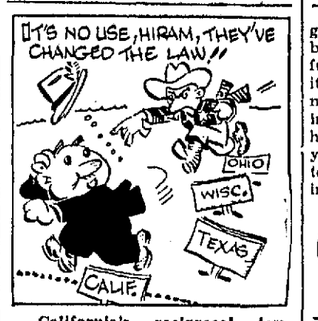

Introduction of Editor C. H. Jones, Helena, Ark, principal speaker—G. L. Young.

Remarks, Myrtle Yerger, principal.

Selection—Progress Choir.

Hiram Surrenders

(Continued from Page One)

California's reciprocal tax statute permits collection of state taxes there.

"But the Pennsylvania Supreme Court, in an opinion with which it is difficult to disagree, held the estate must pay the tax. The Dorrance estate paid—just as Hiram's estate will probably have to pay.

"Then from the state of New Jersey came the tax collector pointing out all the proofs of residence that had been used in the Pennsylvania case—the coting residence, the will, etc. The estate paid again."

Taxpayers Tide On Way Out

Miram's bewildered heirs wondered what had happened to the policy of "one man, one tax." Dean Goodrich explains, "The tide which set in to help the taxpayers about 1930 is now receding."

"Another great estate case points the way to what may be a remedy for the problem of Hiram's heirs," Dean Goodrich goes on. "Massachusetts, Texas, Florida, and New York claimed shares of the estate of Col. Edward H. R. Green. Their claims amounted to more than the entire estate.

"The federal court appointed a master to hear the case. He recommended Massachusetts be considered the home of Colonel Green and the report is now before the court for its approval.

"The tide which set in against the taxpayer has had one more manifestation, a more serious effect," Dean Goodrich tells the heirs. "In other days the relationship between a taxpayer and his state was considered an internal relationship, a kind of a personal matter between the individual and the sovereign state, hardly subject to review in the court of another state. The situation was left open.

"But claims for taxes in other states may be more readily enforcable in the next decade. California already has such a reciprocal law. States where one may be sued for taxes have increased in the last few years.

"Hira mhas now served his purpose. His estate is divided and I draw the veil over his brief life. It will have been most useful if it has directed attention to that great field of law to wheih no man who crosses a state law may close his eyes."

That was Dean Goodrich's farewell to Hiram.

The End

golden anniversary if electricity should be considered a full-grown giant. "A full-grown giant!" he exclaimed. "Why, it's only an infant." I asked Dr. Whitney what electricity would do for us in the future. He answered: "It has hardly begun to do things at all for us yet." The trouble is we do not seem to be able to manage the flow of these inventions as we do the tax rate.

SKI'S THE LIMIT

BY ADELAIDE HUMPHRIES

COPYRIGHT, 1938 NEA SERVICE, INC.

was big and smooth and fair. More than one head turned to look at them, more than one remark not mean to divulge them.

"Maybe Sally's satisfied just to be Queen this year," Pudge remarked, coming gallantly to her rescue. Sally might not be able to see him for dust, which was no small wonder with Corey paying her such open homage, but Pudge wouldn't give up hope until the last gun. "What'd you mean not-good-enough? You're plenty super when it comes to any sport, my love."

"Don't you wish she were your love?" Corey taunted, winking broadly. He pulled his chair a bit closer to Sally's, bent his fair head nearer her dark one. "A penny for your thoughts," he murmured, just for Sally's ears. "Why don't you keep your mind on your work —which is me—why this life-is-real, life-is-earnest attitude, my sweet?"

* * *

SALLY'S eyes smiled back into his. "They're worth much more than that!" she informed him loftily, adding quickly, "How about showing me a bit of shagging?" For Corey prided himself on knowing all the newest, most intricate dance steps. Besides, Sally knew she never was expected to be quiet or serious. That was part of the price paid for maintaining the status of popularity.

"You're a wow for punishment," Corey said with grudging admiration, pulling himself to his feet. "After the strenuous hours we've put in these last two days and nights, and if anyone questions the strenuousness just let him look how my poor knees are beginning to cave in!" He took a circle around the table, making his knees wobble comically, turning his feet on edge, bringing a laugh from everyone at his clowning. Then he whirled Sally out onto the tiny square of polished floor in a dizzy, wild tango that caused the few other couples to shy into corners to watch the exhibition. For among all her other accomplishments, Sally was the slickest dancing partner any fellow ever had.

(Continued from Page One)

"Don't you know? That's Reynolds. He's out for the Olympics. had died down and they had taken a breathless bow before they wandered back toward their table again. "Why aren't you entering the women's events, Sally?" He had expected Sally to come off with top honors, as she had last year. Incidentally, as his girl, he felt she owed it to him. Just as now he felt she owed him an explanation for not entering.

"I told you. I'm not good enough," Sally answered lightly. The color in her cheeks deepened, her heartbeat quickened. Not because she still was breathless from the dance, but because—at last—her bright roving glance had been rewarded. In a far corner, all by himself, his attention completely absorbed in the task of waxing his skis with infinite patience and loving care, sat the person she had been searching for. Apparently he had not even taken time out to observe Sally and Corey's exhibition. Apparently he did not know they were on earth.

"This way!" Sally tugged at Corey's sweater sleeve. She gave him a knowing look. "Remember our 'cheek,' Corey? Be a good boy and keep quiet. And watch the fun."

* * *

SHE walked straight over to that corner, Corey following, his handsome face a bit puzzled, a bit sulky.

"Greetings!" Sally said in her calm, clear voice. She tossed back her dark curls; her eyes held their bright, dangerous look. "We know we're interrupting. A thousand pardons for that. But Corey wants to ask a favor, as one brother to another. Isn't that right, Corey, my lad?" She threw him a laughing look that bound him in intimate understanding.

Corey prided himself on being a good sport. She knew she could rely on him not to let her down.

Dan looked up reluctantly, running one hand absentmindedly, in a sort of caress, down the smoothly-polished ski. He said, "Hello," none too cordially. His eyes—Sally had taken note before have any time for her.

* * *

"Don't bother to get up!" Sally said quickly, significantly. Usually men could not get to their feet swiftly enough when Sally stood before them. She wondered if he was being rude purposely, or if he did not know any better.

* * *

THE slow flush that crept up the high planes of his dark cheekbones answered this. He knew better, all right. For some reason he was determined to snub Sally. His gray eyes still were direct. "I wasn't going to," he answered. "I couldn't risk dropping these." He nodded toward the skis balanced across his knees. "What can I do for you, Corey?" His tone held the tinge of politeness due an upperclassman.

"Corey wants to ask you if you'll give me a lesson in skiing tomorrow morning," Sally put in before her escort could say anything. She slipped an arm through Corey's, gave him a little warning pressure. "Corey says he knows you could teach me better than anyone else. I'll meet you at whatever time you name."

The gray eyes never wavered. If he was taken by surprise, if he wanted to refuse, but felt he could not, Dan Reynolds did not give any sign. "Make it six o'clock," he said. "That's the only possible time I could manage."

"Six o'clock—in the morning!" Sally gasped.

Dan nodded. Briefly, decisively. He bent his head over his skis again, dipped the rag in the wax.

"Serves you right!" Corey's sulkiness vanished. He took Sally's arm to lead her back where she belonged. "I can picture you rising at that unholy hour to win any dare, my sweet! I suppose that's what you're up to. You're usually up to something. But—and this time I'll lay any odds you ask for—you might as well give up before you commence."

"I'll name them," Sally agreed. "And match them with any you care to mention."

She wished she felt as confident as she sounded!
